# JGoodies

We make Java look good and work well

Professional Java Desktop

JGoodies offers freeware, products, and services for Java desktop developers. We focus on Java user interface design and its implementation in Swing. We provide libraries, example applications, desktop patterns, design templates, an application architecture, and a production process – all intended to help you work with Swing effectively and efficiently.

Elegant Design Quickly

Our free open source libraries help you build well designed, consistent Swing views faster. The JGoodies Standard Dialog Library takes Swing design to a new level; it dramatically reduces the time to get style guide-compliant dialogs, and many of them are already done

Swing with Style

The JGoodies Swing Suite and Smart Client support and advocate patterns, conventions, a desktop architecture, and a Swing implementation style that is flexible and easy to learn. This styles makes views and presentation logic easier to read and maintain.

Made in Germany

We favor quality over quantity, a stable API over features, and work hard to deliver solid and reliable implementations for professional Software development and production code. We avoid hype – instead we try to understand your real needs.
